

PRODUCT DESCRIPTION

Drive Units are a convenient power source for submersible pumps and concrete vibrators. Danterr's sourced drive units are fitted with three-claw coupling and can be easily connected to flexible shaft equipment. Drive units are also fixed with roll frames that allow for engine protection. Drive units come in both Honda petrol and Hatz diesel models.

ADVANTAGES

- Three-claw coupling
- Easily transportable Tumbler frame with pan base
- Quality quadrangular frame with anti-vibration supports
- Available with Genuine Honda GX160 petrol engine or HATZ diesel
- Long working life
- Two-year warranty
- Easy maintenance

APPLICATIONS

- Concrete vibrators
- Submersible pumps
