

Sacraform™ is a preformed sacrificial formwork system that incorporates mesh and plastic to create a strong and reliable base for various structural elements under slab.

Sacraform™ can be used to create safety and site privacy screens, footings, ground beams, cages, penetrations and much more.

Sacraform™ is trouble-free to use on site due and can be manipulated to bend for certain applications.

The simplicity of it's design allows for time-saving during the pour and little training to implement the product.

Other benefits for Sacraform™ include minimal tooling for install, easy storage stacking, limitless design manipulation and same day finish for site efficiency.

Product Codes & Sizes

Product Code	Description
103655	Sacraform Sheet 600mm x 2250mm
103658	Sacraform Sheet 900mm x 2250mm
113842	Sacraform Sheet 1200mm x 2250mm
113843	Sacraform Sheet 1500mm x 2250mm
103654	Sacraform Sheet 1800mm x 2250mm

Perfect for pile caps, temporary fencing & footings in foundations.

Brightly coloured for site visibility and safety.
