

One Step to Safety, Zero Steps to Injury

Nevosafe™

Safety Engineered
The Nevosafe™ Difference

Meet Nevosafe™

Danterr's revolution in rebar safety. Designed with a unique capping system and engineered steel core, Nevosafe™ is the epitome of efficiency, safety, and reliability in the construction world.

Key Features & Benefits

Engineered Excellence: In-built steel core ensures protection against potentially fatal impalement.

Swift Installation: Safety in seconds! Install in as little as 7 seconds.

Australian Craftsmanship: Specifically tailored for Australian construction needs.

Versatile Safety: Usable on both horizontal and vertical rebar, with an elongated design that facilitates work on either side.

Bright & Visible: The Nevosafe™ strip stands out in any setting, enhancing site safety.

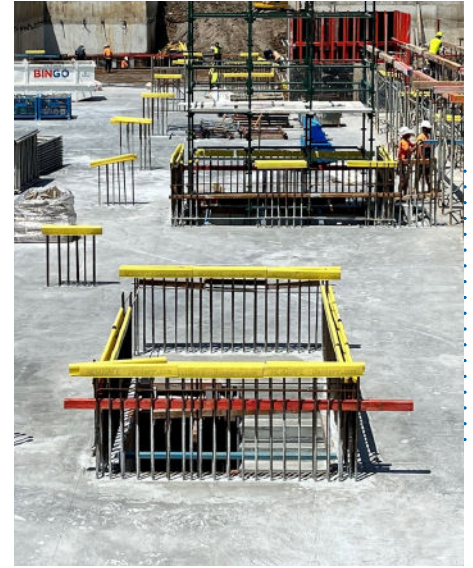

Reusable Mastery: Premium quality allows multiple job site or high-rise uses.

Nevosafe™ Applications

“

Multiplex Constructions implemented the Nevosafe Rebar Safety Strip at the "The One" tower site on 300 George Street. The same Nevosafe strips introduced at Level 5 are still effectively in use at Level 66 within the Jumpform system. It's well-made, easy to use, and significantly boosts efficiency by replacing 1000+ bar caps with just 30 safety strips. I highly recommend Nevosafe for all steel fixing applications.

- Robert L McCulloch, Senior WHSE Coordinator Multiplex Constructions
